

Technology Resources/Information for STUDENTS

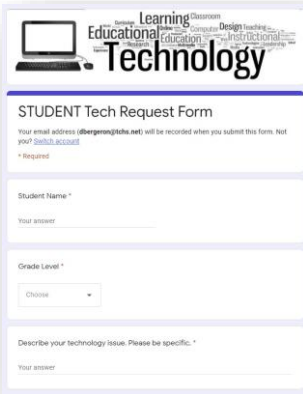

TCHS Technology Department * Leslie & Dexter Bergeron * 3/18/20

TCHS WEBSITE

I've created a Coronavirus Updates & Info page on our school website for students and parents to have easy access to all school communications.

<http://www.tchs.net/resources/coronavirus-info-and-updates.cfm>

STUDENT Tech Request Form

I know students may face technology issues so I've created a [STUDENT Tech Request Form](#) for students to reach out to the Technology Department (Mrs. Leslie and Mr. Dexter) for assistance. The form is also located on the school website's Coronavirus page. Click on the form and create a bookmark for easy access!

CYBERSECURITY – BE CAUTIOUS!!!

As more schools are moving to online learning, we expect to see an increase in phishing emails and malware activity. There are various malicious Coronavirus-themed cyber campaigns currently being conducted, including

- Phishing emails targeting credentials
- Spoofed emails from WHO or CDC containing malware
- Misinformation campaigns on social media/chat apps intending to spread panic/false information
- Fake coronavirus map/tracker applications that steal credentials/distribute malware

Here are a few tips to keep your school and personal accounts and devices protected from these threats

- Always check the URL before entering your username or password.
- Hover over the link in an email before clicking on it, even from known or trusted sources. Report all suspicious emails using the Student Tech Request Form.
